

**§ 1000.554 Which agencies have right of access to the recipient's records relating to activities carried out under NAHASDA?**

(a) HUD and the Comptroller General of the United States, and any of their authorized representatives, shall have the right of access to any pertinent books, documents, papers, or other records of recipients which are pertinent to NAHASDA assistance, in order to make audits, examinations, excerpts, and transcripts.

(b) The right of access in this section lasts as long as the records are maintained.

**§ 1000.556 Does the Freedom of Information Act (FOIA) apply to recipient records?**

FOIA does not apply to recipient records. However, there may be other applicable State and tribal access laws or recipient policies which may apply.

**§ 1000.558 Does the Federal Privacy Act apply to recipient records?**

The Federal Privacy Act does not apply to recipient records. However, there may be other applicable State and tribal access laws or recipient policies which may apply.

**APPENDIX A TO PART 1000—INDIAN HOUSING BLOCK GRANT FORMULA MECHANICS**

This appendix shows the different components of the IHBG formula. The following text explains how each component of the IHBG formula works.

1. The Indian Housing Block Grant (IHBG) formula is calculated by initially determining the amount a tribe receives for Formula Current Assisted Stock (FCAS) (See §§ 1000.310 and 1000.312. FCAS funding is comprised of two components, operating subsidy (§ 1000.316(a)) and modernization (§ 1000.316(b)). The operating subsidy component is calculated based on the national per unit subsidy provided in FY 1996 (adjusted to a 100 percent funding level) for each of the following types of programs—Low Rent, Homeownership (Mutual Help and Turnkey III), and Section 8. A tribe's total units in each of the above categories is multiplied times the relevant national per unit subsidy amount. That amount is summed and multiplied times a local area cost adjustment factor for management.

2. The local area cost adjustment factor for management is called AELFMR. AELFMR is the greater of a tribe's Allowable Expense

Level (AEL) or Fair Market Rent (FMR) factor, where the AEL and FMR factors are determined by dividing each tribe's AEL and FMR by their respective national weighted average (weighted on the unadjusted allocation under FCAS operating subsidy). The adjustment made to the FCAS component of the IHBG formula is then the new AELFMR factor divided by the national weighted average of the AELFMR (See § 1000.320).

3. The modernization component of FCAS is based on the national per unit modernization funding provided in FY 1996 to Indian Housing Authorities (IHAs). The per unit amount is determined by dividing the modernization funds by the total Low Rent, Mutual Help, and Turnkey III units operated by IHAs in 1996. A tribe's total Low Rent, Mutual Help, and Turnkey III units are multiplied times the per unit modernization amount. That amount is then multiplied times a local area cost adjustment factor for construction (e.g. the Total Development Cost) (See § 1000.320).

4. The construction adjustment factor is Total Development Cost (TDC) for the area divided by the weighted national average for TDC (weighted on the unadjusted allocation for modernization) (See § 1000.320).

5. After determining the total amount allocated under FCAS for each tribe, it is summed for every tribe. The national total amount for FCAS is subtracted from the Fiscal Year appropriation to determine the total amount to be allocated under the Need component of the IHBG formula.

6. The Need component of the IHBG formula is calculated using seven factors weighted as set forth in § 1000.324 as follows: 22 percent of the allocated funds will be allocated by a tribe's share of the total Native American households paying more than 50 percent of their income for housing living in the Indian tribe's formula area, 25 percent of the funds allocated under Need will be allocated by a tribe's share of the total Native American households overcrowded and or without kitchen or plumbing living in their formula area, and so on. The current national totals for each of the need variables will be distributed annually by HUD with the Formula Response Form (See § 1000.332). The national totals will change as tribes update information about their formula area and data for individual areas are challenged (See §§ 1000.334 and 1000.336). The Need component is then calculated by multiplying a tribe's share of housing need by a local area cost adjustment factor for construction (the Total Development Cost) (See § 1000.338).

7. No tribe in its first year of funding will receive less than \$50,000 under the Need component of the formula. In subsequent allocations to a tribe, it will receive no less than \$25,000 under the Need component of the formula. This increase in funding for the tribes receiving the minimum Need allocation is
